

Neurodivergence Screening Questionnaire (Question Format) & Flowchart

This questionnaire is designed to help individuals reflect on patterns related to neurodivergent traits such as ADHD, OCD, Autism Spectrum, Anxiety, and Depression. Each question is answered on a 5-point Likert scale:

Strongly Agree (5) | Agree (4) | Neutral (3) | Disagree (2) | Strongly Disagree (1)

ADHD (Attention-Deficit / Hyperactivity Disorder)

1. Do you struggle to stay focused on tasks that don't interest you, even when they're important?
2. Do you often start multiple projects but find it difficult to complete them?
3. Do you tend to act or speak before thinking things through?
4. Do you feel mentally restless, even when your body is still?
5. Do you have trouble keeping track of time or remembering deadlines?

OCD (Obsessive-Compulsive Disorder)

1. Do you feel an uncontrollable urge to check things repeatedly (like locks, switches, or messages)?
2. Do certain thoughts get stuck in your mind even when you try hard to ignore them?
3. Do you perform certain actions (like washing, counting, or arranging) to reduce anxiety?
4. Do you feel intense discomfort when things aren't done "the right way" or placed symmetrically?
5. Does your daily life or routine get disrupted because of repetitive thoughts or behaviors?

Autism Spectrum Traits

1. Do you find social interactions confusing or exhausting?
2. Do you prefer following specific routines and feel distressed when they change unexpectedly?
3. Do you often notice small details or patterns that others seem to miss?
4. Do you feel overwhelmed by loud noises, bright lights, or certain textures?
5. Do you have one or more interests that you can talk or think about for hours without getting bored?

Anxiety

1. Do you often worry about future events, even when there's no clear reason?
2. Do you find it hard to relax, even during your free time?
3. Do you overthink small mistakes or social situations long after they happen?
4. Do you experience physical symptoms (like a racing heart or tense muscles) when you feel anxious?
5. Do you frequently feel like something bad might happen, even when things are going well?

Depression / Emotional Regulation

1. Do you often feel drained or unmotivated, even when you've had enough rest?
2. Do you lose interest in activities you once enjoyed?
3. Do your emotions shift quickly or feel more intense than others seem to experience?
4. Do you sometimes feel disconnected from yourself or your surroundings?
5. Do you struggle to find joy or purpose in daily life?

Scoring Guide

Category	Question Nos.	Possible Range	Interpretation (Example)
ADHD	1–5	5–25	$\geq 18 \rightarrow$ ADHD traits likely
OCD	6–10	5–25	$\geq 17 \rightarrow$ OCD traits likely
Autism Spectrum	11–15	5–25	$\geq 16 \rightarrow$ Possible ASD tendencies
Anxiety	16–20	5–25	$\geq 18 \rightarrow$ Generalized anxiety patterns
Depression	21–25	5–25	$\geq 17 \rightarrow$ Depressive/emotional regulation concerns

Flowchart Logic:

1. Collect all 25 answers using the 5-point scale.
2. Group answers into their respective categories (ADHD, OCD, Autism, Anxiety, Depression).
3. Calculate total or average scores per category.
4. Identify top 1–2 categories with highest scores above threshold.
5. Display insights to user:
 - “Your responses indicate ADHD-like traits.”
 - “You show tendencies aligned with OCD patterns.”
 - “You may relate to autism spectrum characteristics.”
6. Suggest helpful next steps:
 - “Consider consulting a psychologist for assessment.”
 - “Explore self-regulation and focus improvement strategies.”
